

PROJECT BASED LEARNING FROM FWD

ABSTRACT

- Planning adventure trips can be difficult due to the large number of destinations, activities, and travel options available.
- Travelers often need to search through multiple websites to find information about destinations, weather, accommodation, transportation, and activities.
- The Travel Destination Guide for Planning Adventures is proposed to simplify trip planning.
- The platform helps users discover adventure destinations and explore different activities.

CO1 Internet Fundamentals, HTML & Introductory CSS

- ✓ Responsive Dashboard Design
- ✓ Semantic HTML
- ✓ CSS Flexbox/Layout
- ✓ Form Styling

Global Adventure AI

Real-time trip logic for 2026

Enter Country (e.g. Japan) dd-mm-yyyy 3 Days Adventure

Generate Real-Time Plan

CO2 JavaScript Programming Essentials

- ✓ Interactive Start
- ✓ Trending Algor
- ✓ Bookmark & Co

Generate Real-Time Plan

22°C (Typical for Paris) Est. Budget: \$750 Best for: Adventure

Day 1: Explore Coastal Region
Primary Adventure: Hidden Landmark Hike
Details: Experience the best of Paris with a deep-dive into Coastal Region's local culture and scenery on 2026-03-25.
#Adventure2026 #ParisTravel

Day 2: Explore Mountain Highlands
Primary Adventure: Sunset Viewing
Details: Experience the best of Paris with a deep-dive into Mountain Highlands's local culture and scenery on 2026-03-26.
#Adventure2026 #ParisTravel

CO4 Advanced Web Development & Deployment

- ✓ User Authentication
- ✓ RESTful API End
- ✓ Admin Panel with
- ✓ Deployment Read

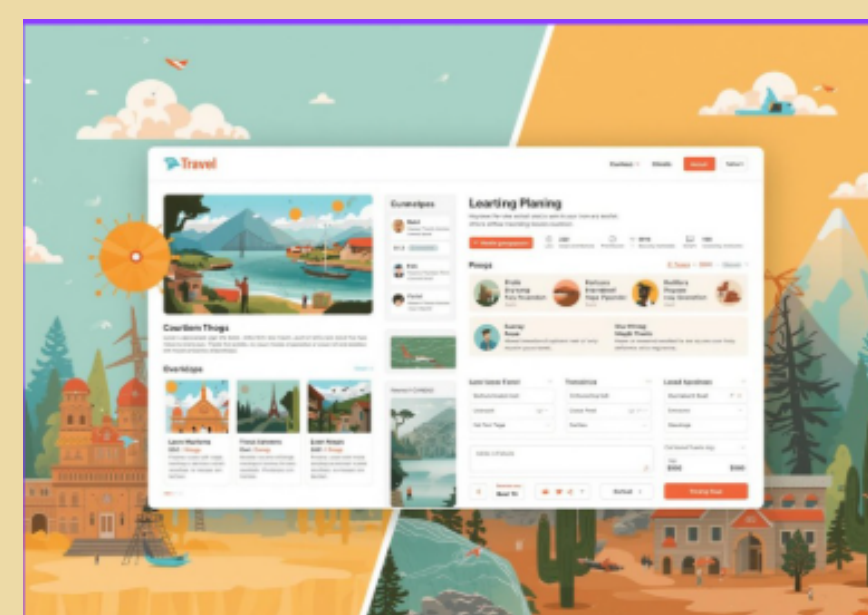

Day 3: Explore The Capital City
Primary Adventure: Local Food Tour
Details: Experience the best of Paris with a deep-dive into The Capital City's local culture and scenery on 2026-03-25.
#Adventure2026 #ParisTravel

Day 4: Explore Coastal Region
Primary Adventure: Hidden Landmark Hike
Details: Experience the best of Paris with a deep-dive into Coastal Region's local culture and scenery on 2026-03-25.
#Adventure2026 #ParisTravel

Day 5: Explore Mountain Highlands
Primary Adventure: Sunset Viewing

Conclusion & Future Scope

- This project demonstrates **core web** development concepts, like responsive UI, form handling, interactivity, and backend integrations. In future, the system can be expanded seamlessly and enhanced with AI-driven recommendations.
